GAUTAM REDDY

BUSINESS ANALYST | TECHNOLOGY CONSULTANT

reddygautam98@gmail.com | reddygautam98.github.io/GautamTheAnalyst.io/
linkedin.com/in/gautam-reddy-analyst | github.com/reddygautam98

PROFESSIONAL SUMMARY

Business Analyst with 4+ years of experience connecting business needs and technical delivery through requirements engineering, data analysis, API/payment-gateway integration, Agile delivery, and UAT coordination. Creates clear, testable requirements and turns operational data into insight.

100,000+	3	2	350+
TRANSACTIONS ANALYZED	SLA PATTERNS IDENTIFIED	GATEWAY INTEGRATIONS	TEST CASES COORDINATED

PROFESSIONAL EXPERIENCE

Business Analyst

Marolix Technology Solutions

- Analyzed 100,000+ transaction records using SQL/Python; identified three recurring SLA patterns.
- Supported two payment-gateway integrations: API requirements, mapping, scenarios and UAT.
- Improved reporting workflows using SQL, Python, Power BI and AWS Redshift.

Business Analyst / Technology Consultant

V Moksha Technologies

- Worked with client teams on solution design, requirements documentation and test strategies.
- Prepared business and functional requirements, user stories and acceptance criteria.
- Supported workshops and release coordination; kept scope, dependencies, risks and decisions visible.

Business Analyst; previously Associate Software Engineer

Iinfocomm IT Services

- Supported issue/project management, capacity metrics and timesheet reporting; progressed into BA.
- Coordinated functional, integration, regression and UAT coverage across 350+ test cases.

ADDITIONAL DELIVERY EVIDENCE

- 20+ workshops involving 13+ stakeholders; 12+ change requests across two Agile releases.
- Risk-based pricing analysis associated with 10% higher contract renewals; ETL improvements with 15% higher operational efficiency.

GAUTAM REDDY | CAPABILITIES & EDUCATION

Business Analysis | Data & BI | Systems & Delivery

CORE CAPABILITIES

BUSINESS ANALYSIS & PRODUCT

Requirements workshops and stakeholder interviews

BRD / FRD, business rules and process analysis

User stories, acceptance criteria, RTM and impact analysis

Agile refinement, RAID/RACI and change control

Requirements traceability and structured handover

DATA & REPORTING

SQL: MySQL, SQL Server and PostgreSQL

Python, pandas, data profiling and quality checks

Power BI, DAX, Power Query and Advanced Excel

KPI definition and reporting automation

Operational analysis and data-driven insight

SYSTEMS, TESTING & TOOLING

API requirements and field mapping | Payment integration scenarios | UAT coordination

Functional, integration and regression testing | Defect follow-up | Release validation

Jira | Confluence | Azure DevOps | SharePoint | Git/GitHub | AWS Redshift

SELECTED WORK & ARTIFACTS

Personal projects: Sales Data Analysis, HR Data Analysis, Sales Forecasting Report and MetaLayer.
Portfolio samples include illustrative PayTrack BRD/FRD, stories, RTM, test cases, UAT plan,
process diagrams, API sequence and data model; samples are not client implementation claims.

Payments learning artifacts

ISO 20022 pain.001 to pacs.008 mapping and payment-rails learning notes (RTGS, NEFT, IMPS, UPI and SWIFT MT-to-MX).

EDUCATION & PROFESSIONAL DEVELOPMENT

B.Tech, Mechanical Engineering (Minor in Computer Science)

Biju Patnaik University of Technology, Odisha | 2016-2020

CBAP (IIBA) - In progress

Google Data Analytics Professional Certificate - Coursera, 2023

Metrics reflect the scope described in the profile; PayTrack artifacts are illustrative only.
