Agile, Testing & Delivery: SDLC, Agile/Scrum, Sprint Planning, Backlog Refinement, Change Management, UAT Coordination, Functional, Regression & Integration Testing, Defect Triage
Technical Skills & Tools: REST API Requirements, API Contract Review, System Integration Requirements, SQL, Python (Pandas), Excel, Power BI, JIRA, Confluence, Figma

PROFESSIONAL EXPERIENCE

Business Analyst Oct 2023 – Nov 2024
Marolix Technology Solutions Pvt Ltd, Hyderabad, India

- Defined REST API requirements, UML system flows, and data mappings for 2 payment gateway integrations, providing implementation-ready documentation for Engineering and QA.
- Analyzed 100,000+ transaction records using SQL and Python, identified 3 recurring SLA breach patterns, and shared findings to inform process-improvement actions.
- Elicited and validated requirements through 20+ workshops with 13+ stakeholders; documented BRDs/FRDs, functional and non-functional requirements, use cases, and BDD acceptance criteria.
- Prioritized requirements across 4 modules using MoSCoW and challenged 3 feature requests with insufficient business justification to keep backlog decisions focused on business value.
- Coordinated UAT and functional, regression, and integration testing across 350+ test cases; supported JIRA defect triage with QA and Engineering, with zero critical defects reported.
- Managed 12+ change requests across 2 Agile releases, assessed requirement impacts, and maintained traceability through delivery.
- Maintained business rules, data dictionaries, and field mappings in Confluence and Excel; reviewed Figma wireframes and prepared stakeholder reports.

Business Analyst Feb 2023 – Mar 2023
V Moksha Technologies Pvt Ltd, Bengaluru, India

- Resolved recurring SLA shortfalls and reduced error recurrence and rework, saving 2 weeks per improvement cycle through SQL analysis, fishbone/5-Why root-cause analysis, and AS-IS/TO-BE process mapping.

Business Analyst Apr 2022 – Dec 2022
Iinfocomm IT Services Pvt Ltd, Bengaluru, India

- Facilitated Three Amigos sessions and translated stakeholder needs into functional requirements and BDD acceptance criteria for 3 concurrent modules delivered on time.
- Documented functional requirements, business rules, and control requirements across 4 business units.
- Coordinated UAT, smoke, sanity, and regression testing across 50+ JIRA-tracked test cases; the delivered modules had no reported post-launch incidents.
- Reviewed API contracts against functional requirements and maintained the Requirements Traceability Matrix (RTM) and RACI to connect requirements, delivery, and acceptance.

Associate Software Engineer Nov 2020 – Apr 2022
Iinfocomm IT Services Pvt Ltd, Bengaluru, India

- Promoted to Business Analyst within 17 months, six months ahead of the expected timeline, after managing requirements for 3 reporting features from elicitation through stakeholder acceptance.
- Translated input from 15+ Finance and Operations stakeholders into Power BI requirements and BDD user stories, coordinating with Engineering and business leads.
- Built a business case for reporting automation projecting 3+ hours of weekly manual-effort savings and secured executive approval.
